Stop Lawlessness.

Conditions in San Francisco demand that the strong arm of the law—military interference if need be—be exerted to put an end to the scenes of lawlessness and violence, which are being enacted in that city. Why the criminal acts which are every day being perpetrated in aid of the striking Carmen's cause should be allowed to go on is beyond explanation. The police force is evident at heart in sympathy with the strikers, and while at the deeds of violence and interference with the operation of the street railway system as much as possible. They keep up an outward appearance of peace officers to "save their face" and hold their jobs, but they quietly aid the strike whenever they can. There may be a few exceptions. The Carmen openly boasted that the police were their allies in this contest; and there is no doubt they knew where they spoke.

The continuance of this strife is very damaging not only to San Francisco, but the entire state. It conveys the idea that California is disorderly state—belongs to the "wild and wooly west," and that the authorities are negligent about the enforcement of law necessary to secure peaceful and stable condition. Governor Gillett is outspoken in demanding the suppression of violence. But he is evidently loath to step into the breach with the state militia, and preserve the peace at all hazards. Talk is all very well in its place, but man of action is needed in this emergency. The mob scenes have been tolerated too long. Had the militia been quartered in San Francisco at the start it would have saved a heap of trouble. It would have told the unruly element that labor organizations cannot defy the law; that vested capital must be protected, and men—non-union strike breakers if you please—are as much entitled to earn their living at posts vacated by the Carmen, as any other class of workers.

The fatal delusion hugged by labor union men is that fealty to the dictation of their organization is deemed of more binding obligation than the laws. They talk about winning strikes by peaceful means only. But their acts do not as a rule rhyme in with their professions. The strike is not being carried on within the pale of law, and this fact, sifted to its logical conclusion, means that they have no faith in peaceful methods of conducting their contests. The boycott upon which they depend so much is a peaceful weapon, as much of a violent resort as the flinging of brick-bats at a car, or the use of dynamite. It is coercion of the vilest kind, an unlawful conspiracy.

One of the common evils attending the incorporation of small towns is the danger arising from over-officiousness, which is usually in the form of intermeddling with private affairs by the city authorities. Somebody imagines that a neighboring property holder might do better by arranging the out-buildings on his lot in conformity with the notions of the aggrieved neighbor. A complaint is poured into the city officer; an effort is made to magnify the matter into a nuisance, which the city ought to abate to suit the views of the complainant. Too often the officers, with the object of making peace, take steps to effect a re-adjustment of plans, and thereby too often increase the friction, without accomplishing any good whatever. The truth is, nuisances of a public character—those that affect the well-being of a number of citizens, are the only ones that call for the interference of the officer. A notion that one neighbor is not acting according to the welfare of another neighbor, is a private affair, and should be settled by the parties thereto in a civil action. The more the community as a whole is dragged into such squabbles, the more pronounced will become the dissatisfaction with local government.

Banks in San Francisco are asking as high as 8½ per cent for money for building operations in San Francisco. Loans are hard to get at any figure.

Ladies Attention! Send your name, address and size of dress-shields, also name of dry goods store where you trade and receive free sample pair "Canfield's" Hicks Brand Gossamer Weight Shields. Address "Canfield" care of the S. H. & M. Co., 25 South St., San Francisco, Cal.

When the Hair Falls

Then it's time to act! No time to study, to read, to experiment! You want to save your hair, and save it quickly, too! So make up your mind this very minute that if your hair ever comes out you will use Ayer's Hair Vigor. It makes the scalp healthy. The hair stays in. It cannot do anything else. It's nature's way. The best kind of a testimonial—
"Sold for over sixty years."

For Stable Conditions.

The San Francisco situation is developing into a contest between the opposing forces represented by the advocates of "closed shop" or "open shop." The boycott sought to be established by the labor unions against those who ride on the street cars and the merchants and tradesmen who sell goods to strike-breakers, has tended to define the issue squarely. The open shop men were not slow in taking up the gauntlet to terrorize the tradesmen by the withdrawal of patronage by the entire union labor element. It brought the wholesalers, bankers and big contractors into the field, and their powerful influence is to be exerted to offset the boycott movement of the unions. This is the natural outcome of the boycott system. It cuts both ways. It is a mistaken notion that one side can resort to it without a reaction.

The truth seems to be impressed upon, San Francisco people that the demands of organized labor in that city have reached the limit. Property owners are not safe in rebuilding banks are refusing to loan money for rebuilding operations, contractors are timid about making contracts, all owing to the uncertain conditions of the labor market. A re-adjustment along the line is called for—a re-adjustment that will afford a guarantee of settled conditions as to wages for the next year at least. Until this is accomplished the rebuilding of the city will proceed slowly. If the industrial strife results in bringing about stable conditions in this respect, it will be a great gain for San Francisco.

BOOMING ROOSEVELT.

The re-nomination of Theodore Roosevelt is being urged by a large and influential following of republicans. It is argued that this would not mean a third term in the usual acceptance of that phrase. The third term idea is a candidate for three successive terms as president. Roosevelt has been a candidate for president once. He was the candidate for vice-president at the election of 1900 when McKinley was elected, and became president on the death of McKinley only five months after his inauguration. It is true that Roosevelt will have served nearly two full terms at the close of his present term of office, but strictly speaking a re-nomination would make him a presidential candidate of two terms. Nevertheless, all the prejudices against a third term would be appealed to in the event of his re-nomination.

It is undeniable that there is in the popular mind a strong feeling against one man occupying the position of president for three terms in succession. Whether this prejudice is based on sound reasoning or not, it is deep-rooted, and would certainly have an effect at the ballot box.

Roosevelt is unquestionably popular with the masses, for the courageous stand he has taken to correct abuses of the trusts and big financial combinations. It must also be admitted that by his course he has awakened determined opposition on the part of heavy monetary interests. Also, the laboring classes, especially those identified with trades unions, are displeased with him on account of his statement braiding some of the labor leaders as "undesirable citizens." This would have an effect.

Roosevelt is not a candidate to succeed himself. He has declared all along that under no circumstances would he be a candidate. But should the nomination be tendered him, would he refuse to accept it? Such a declination has never happened, and it is not probable that it would happen in the case of Roosevelt under the circumstances. However, the forces of the administration are in favor of the nomination of Tamm. He seems to be the candidate selected, perhaps because he is in sympathy with the policies inaugurated by Roosevelt, and would continue on the same line if elected. The situation in this respect is a novel one. Never before has the power of the administration been directed to the naming of a candidate for president outside of the incumbent.

Accidents will happen, but the best-regulated families keep Dr. Thomas' Electric Oil for such emergencies. It should be settled by the parties thereto in a civil action. The more the community as a whole is dragged into such squabbles, the more pronounced will become the dissatisfaction with local government.

Banks in San Francisco are asking as high as 8½ per cent for money for building operations in San Francisco. Loans are hard to get at any figure.

The Selby works have settled the numerous suits brought by farmers around Benicia for damages to their lands by reason of the poisonous fumes from the smelter. They compromised by paying \$30,000, and the suits have been dismissed. The company will take measures to prevent damage in future.

LANCHA PLANA.

From Stockton Record.
May 24.—Steve Lucas, a son of J. L. Lucas of the Julian District, met with painful accident on Wednesday afternoon. As he was about to enter the basket to cross the river on the trolley erected recently, one of the pulleys fell and struck him on the arm, dislocating his elbow, and severely bruising his arm.

Phil Sheridan and C. F. Craddock were passengers on the stage to Lancha Plana on Wednesday. Mr. Craddock, who has been working at the Smelter here, will shortly remove to Kennett, where he has secured work.

Loganberries are being gathered in this neighborhood and there will soon be work for a number of pickers. The crop this year promises to be a heavy one. It is claimed by men who grow these berries extensively in the state are produced in this vicinity. The largest producers here are A. Diebold, J. Gooding, James and J. L. Lucas, M. Foster, J. Cavagno and L. Bacigalupi. These gentlemen clear a neat sum each year from loganberries.

Lovers of fishing are having a good time at present along the Mokelumne river, and especially at the ruins of the dam at the old Westmureland bridge, where your correspondent has seen fish taken out, weighing four and five pounds. The river seems to be better stocked this year with large fish than previously, probably owing to the unusually high water in March.

Although badly handicapped by high water, work on the trestle for the pipe line is progressing rapidly, and the people of Camanche will soon be rejoicing over a plentiful supply of water.

Miss Maud Pardoe, who has been spending the past month with her parents, Mr and Mrs D. B. Pardoe, returned to Soquel on Tuesday.

B. W. Thayer has laid the foundation for a fine residence near his mine two miles east of Laucha Plana.

OWENS-BERRYMAN.—In Amador City, May 22, 1907, James Curtis Owens of Contra Costa county, to

Miss Edythe W. Berryman of Amador City.

DIED.

WESTFALL.—In Ione, May 23, 1907, Elvie Ellen Westfall, a native of Ione, aged 18 years 3 months and 14 days.

DUPRENE.—Near Ione, May 23, 1907, Mrs Elizabeth Dufrene, a native of England, aged 75 years and 6 months.

BODINAR.—Near Bunker Hill, May 26, 1907, James Bodinar, a native of England aged about 66 years.

THOMPSON.—In the county hospital, May 26, 1907, Mary Thompson, a native of Germany, aged 55 years.

Died away during the flood.

DeWitt's Carbolized Witch Hazel Salve does not merely heal on the surface; it penetrates the pores and promptly relieves pain, caused by boils, burns, scalds, cuts and skin diseases. It is especially good for piles. Beware of imitations. Sold by F. W. Ruhsen.

Mrs McKinley, wife of the late President McKinley, died in Canton, Ohio, on the 26th, and her body now rests in the family vault in the cemetery of that city. President Roosevelt and members of the cabinet attended the funeral.

"Here's to your health and happiness"—DeWitt's Little Early Risers—famous little pills. Nasty, sick headache or biliousness may come any time; the cure is an Early Riser. Sold by F. W. Ruhsen.

To Whom It May Concern.

The Board of Education of Amador county will meet at 10 o'clock a.m. on Saturday, June 3rd, in the Superintendent of Schools' Office, making out and adopting questions to be submitted to the pupils for graduation from the Grammar schools of Amador county.

The examinations will begin at 9 a.m. on Tuesday, June 11th, and end on Wednesday, June 12th two days being given for the examinations.

A member of the Board will conduct the examinations in Sutter Creek, Jackson, Ione, Plymouth and Volcano.

On June 13th, and 14th the Board of Education will correct and grade the papers of the pupils, and issue Diplomas to the successful applicants.

On June 15th the Board will draw certificates, grant recommendations for State Educational Documents, adopt supplementary and library books.

Roosevelt is unquestionably popular with the masses, for the courageous stand he has taken to correct abuses of the trusts and big financial combinations. It must also be admitted that by his course he has awakened determined opposition on the part of heavy monetary interests. Also, the laboring classes, especially those identified with trades unions, are displeased with him on account of his statement braiding some of the labor leaders as "undesirable citizens." This would have an effect.

RUSHER'S

CITY PHARMACY.

Jackson, Cal.

LOCAL NEWS

Mr Lewis, who has entered into a partnership with B. C. O'Neill in the undertaking business, came over to this city last Saturday. He is about to locate here permanently and expects to take charge of the undertaking business. A complete stock has arrived.

C. E. Day, former editor of the Mokelumne Hill Chronicle, but who has been managing the Blair Booster of Blair Nev., has severed his connections with that paper. He published his valedictory in last week's issue, alleging ill health as the cause of his retirement from that section, the climatic conditions not being suitable.

Mr and Mrs Charles Corin, of Camp Seco copper mine, were summoned to Amador City Sunday by the sad news of the death of James Bodinar, after a long illness.

Dr Goodman of Sutter Creek, went to Sacramento last week for medical treatment, leaving Dr. Phillips to look after his practice in the meantime. He returned after a few days, much improved, and has resumed his practice.

Fresh stock of wall paper, complete line, all new designs at V. Giovannoni & Co.

United States senator Geo. C. Perkins, accompanied by Miss Perkins, came to Amador county Saturday. They went on to the Fremont mine, in which the senator is largely interested.

The American Biograph Co. gave an entertainment in Love's hall Monday evening, consisting of moving pictures illustrative of the San Francisco street car strike, the Thaw trial, and comic scenes. There was a large audience.

Rev. C. E. Winning of the Methodist church will on next Sunday even-

ing deliver the address on "Christian science—its cause and cure," which he was to have delivered two weeks ago, but was called away for funeral services. Will be usual services at 11 a.m., and Sunday school at 2 p.m. The public is cordially urged to attend any or all of these services.

C. C. Jensen, the well-known optician, has been here for nearly two weeks. He is an expert in his profession, and those who have once had his service in fitting eye-glasses are usually perfectly satisfied with his work. He will remain here until Sunday, on which day he expects to return to his home in Chico.

Alex Endey came up Saturday evening, to spend a few days with friends in this city.

J. F. Wilson. Dentist. Hours 9 a.m. to 5 p.m. Phone—Office, black 441; residence, Black 394; Jackson.

J. Knuckey has been laid up for several days with an attack of appendicitis. He is getting along nicely.

Mrs French of El Dorado county, was operated upon at the Sierra Sanitarium for a serious case of appendicitis. She is recovering. Mr McCabe of San Andreas, is also a patient at the same sanitarium.

Judge R. C. Rust went to San Andreas, to try a case in the superior court of Calaveras. It was expected that the case would occupy four days.

Kernst Lemin, who is employed in a drug store in San Francisco, came home Monday, to attend the funeral of his grandfather, James Bodinar, at Amador City Tuesday.

Ernest Spagnoli, who has been a law student in San Francisco, came home Friday evening, to spend a vacation of a month or six weeks.

Alex Endey was a passenger for San Francisco yesterday morning. He will return in a few days accompanied by his family, and will take up their residence here permanently.

Ice cream at P. Cuneo's every day, commencing April 27.

Jas. Jay Wright returned to Oakland Saturday morning. He will remain there for about two weeks more, and then proceed to Goldfield, Nev., to take a position in Claude M. Smith's office, and also attend to the secretary's duties for the Del Monte Goldfield Company.

Mrs Koch, after a short stay on the old McFarland ranch, left for her home in Sacramento on Saturday. While here she disposed of her property on Main street, occupied as the ice cream parlor by Mrs C. Giocchio, to Mr Giocchio. The exact price we have not heard, but it was between \$3000 and \$3500, several hundred dollars below the figure held out for a few months ago.

Mrs Jos. Cademartori left this week to join her husband, who is employed as foreman of a mine at Blair, Nev.

A number of those who went to the city in search of employment at the high wages prevailing there are returning, owing to the unsettled labor conditions existing in San Francisco. A score or more of workers in various callings, have returned to Amador county within the past few weeks.

When you wish the finest flavored coffees and teas, remember that W. J. Nettle keeps only the best.

M Newman left for Oakland Wednesday.

Back from England.

William Pellow, who is stone blind from an explosion in the mines which happened 12 or 14 years ago, returned Sunday evening to Jackson, after an eight months' absence in his native country, England. He has made three trips to the old country since he became blind, and the most remarkable fact about it is that he travels a great part of the time alone. This last venture he made alone, except for his fellow passengers en route, who of course would attend to the wants of one in his condition as far as they were able. He left Jackson on this latest journey September 11 last. His intention was to remain in England permanently. But, like most of those who have been in America nearly all their days, as Pellow has, especially in the foothills of California, he soon found that the conditions in the old country were not at all suitable. In the first place the climate was uncongenial. He was in Cornwall, near the sea coast, and the heavy air was so very different from that which he had breathed in the foothills here, that his health was affected. He was ailing all the time, so he concluded that he couldn't live there. He started on the home trip the 11th of May for New York, and thence by the first train thereafter left for California, reaching Jackson on the 25th, consuming just 15 days in the trip. He is content to pass the rest of his days in Amador county. He is looking well, has lost no flesh, and is heartily glad to get home. He is making his home with his son-in-law, W. Pascoe. He is nearly 70 years of age, and a blind traveler of such advanced years is entitled to a newspaper article.

Death of James Bodinar.

James Bodinar, an old and highly respected resident of Amador county, died at his home, near the Bunker Hill mill at an early hour on Sunday morning, May 26. He had been sick with miners' consumption for six years, and was unable to work during that period. He formerly worked in the mines around Amador City. He was born in England about 60 years ago, but for over 25 years has been a resident of this county. He leaves a widow, and two children by his first wife, one son, James Bodinar, who lives at the home place, and one daughter, Mrs T. Lemin of Jackson. The funeral took place at Amador on Tuesday afternoon, under the direction of the Knights of Pythias, of which organization he was a member. The funeral was largely attended by his brother members, and also by citizens generally, who manifested their appreciation of his sterling qualities in life by this tribute to his memory. Interment in Oak Knoll cemetery.

Rev. C. E. Winning of the Methodist church will on next Sunday even-

ing deliver the address on "Christian science—its cause and cure," which he was to have delivered two weeks ago, but was called away for funeral services. Will be usual services at 11 a.m., and Sunday school at 2 p.m. The public is cordially urged to attend any or all of these services.

S. Nardini and wife, who have been visiting relatives of the latter, the Raggio family at Jackson Gate for the past week, left for their home in Woodland Wednesday. Mr Nardini left here about twenty years ago. He is engaged in the hotel and saloon business in Woodland.

Ten or twelve Austrian miners came over from Angels Tuesday. They are emigrating from that closed down camp in large numbers. The report that the mine owners were considering the proposition to open the mines on an eight hour basis, is pronounced groundless. They will reopen on the same terms as prevailed before the strike. The Utica has been worked at a loss of several years. The company has a valuable power plant, operated by water, connected with the mines. This power has been used to run the machinery at the mines. With the mines closed, the power available would bring in a good income if sold elsewhere. So the company is losing nothing by the shut-down, but the chances are that it will make more profit by disposing of power in other channels. The

Garden hose, lawn sprinklers, lawn mowers, rakes, hoes and spades, in fact everything needed for lawn or garden at V. Giovannoni & Co.

The crazy Chinaman, 84 years of age, in the hospital, mention of whom was made last week, walked through a glass door at the hospital the other day, cutting himself somewhat. He imagines eight female devils are chasing him.

The characterizing of land as coal must be determined by the actual production from mining on the tract, or by satisfactory evidence that coal exists thereon in sufficient quantity to make it more valuable for mining than for agriculture.

The allowance of an application to contest a final entry is a matter resting in the sound discretion of the commissioner of the Land Office.

Local officers have no authority to order a hearing on a final entry.

Second homestead entries may be allowed at the end of April 29, 1904 (33 Stat., 527), to persons who have made, and also abandoned, former entries prior to said act.

L. F. Stinson retires from the management of the Amador Record on the 1st of June; his lease expiring on that date. The paper has back into the hands of the proprietor, H. W. Phillips.

Maurice Newman left for Stockton yesterday. He will meet his father there, and the two will then proceed to Oakland and San Francisco.

Mrs Sears, a government agent connected with the Forest Reserve service, was in Jackson to-day, on his way to visit the forest reserve in the eastern part of the county.

When you wish the finest flavored coffees and teas, remember that W. J. Nettle keeps only the best.

M Newman left for Oakland Wednesday.

B. C. O'Neill will move his grocery store from Court street to the building formerly occupied by W. E. Kent on Broadway. Will open in the new premises on the 10th June.

Removal Notice.

B. C. O'Neill will move his grocery store from Court street to the building formerly occupied by W. E. Kent on Broadway. Will open in the new premises on the 10th June.

Mr Sears, a government agent connected with the Forest Reserve service, was in Jackson to-day, on his way to visit the forest reserve in the eastern part of the county.

LOST.—In Jackson between Broadway and Court street, two child coats, in a roll, one Pongee the other White Wool. Finder will please leave same at the ledger office.

Dewitt's Witch Salve
For Piles, Burns, Sores.

Decoration Day.

William Pellow, who is stone blind from an explosion in the mines which happened 12 or 14 years ago, returned Sunday evening to Jackson, after an eight months' absence in his native country, England. He has made three trips to the old country since he became blind, and the most remarkable fact about it is that he travels a great part of the time alone. This last venture he made alone, except for his fellow passengers en route, who of course would attend to the wants of one in his condition as far as they were able. He left Jackson on this latest journey September 11 last. His intention was to remain in England permanently. But, like most of those who have been in America nearly all their days, as Pellow has, especially in the foothills of California, he soon found that the conditions in the old country were not at all suitable. In the first place the climate was uncongenial. He was in Cornwall, near the sea coast, and the heavy air was so very different from that which he had breathed in the foothills here, that his health was affected. He was ailing all the time, so he concluded that he couldn't live there. He started on the home trip the 11th of May for New York, and thence by the first train thereafter left for California, reaching Jackson on the 25th, consuming just 15 days in the trip. He is content to pass the rest of his days in Amador county. He is looking well, has lost no flesh, and is heartily glad to get home. He is making his home with his son-in-law, W. Pascoe. He is nearly 70 years of age, and a blind traveler of such advanced years is entitled to a newspaper article.

Arriving at the cemetery, impressive exercises were held under the shade of a grove of trees. Dr. E. E. Endicott, the president of the occasion, gave an address, appropriate and to the point, after music by the band. Then followed prayer by the chaplain, Rev. E. C. Winning. Next came singing by the choir, a quartet consisting of Mrs Endicott, Miss Sauginetti, H. E. Kay and Wm. Peury, Jr. Judge R. C. Rust was then introduced and spoke of the appropriateness of the place to hold the exercises, within the confines of the city of the dead; of the origin of memorial day, and the universal observance thereof in every part of the union. He referred to the obligation citizens owed to the flag of their common country, and that they should allow no other flag to interfere in any manner with their duties as citizens and residents of this great nation. With more singing by the quartet, and music by the band, this concluded the literary exercises. There were at least 500 persons present. Most of those present carried a bouquet of flowers with which to decorate the graves.

The members of the Knights of Pythias were then conducted through the cemetery to decorate the graves. Small flags had been placed to mark the graves of the Pioneer dead; and larger flags to indicate the resting place of ex-soldiers of the civil war. These were all visited, and a bouquet placed on each, also on the graves of the members of the Knights of Pythias and other orders. The number of mounds thus remembered must have exceeded one hundred. This done the procession again formed outside the cemetery, and headed by the band, marched back to town and disbanded.

Having received a large consignment of extra choice olives, 75¢ per gal, or 20¢ qt. Call and try them. V. Giovannoni & Co.

Frog Hunting.

Dr. Endicott and Frank Valvo started Monday afternoon on a novel hunting expedition. Armed with small rifles, they went out to hunt for frogs in the pools of the upper watershed of the north fork of Jackson creek, above Jackson Gate. This is above the point where the water is polluted by the debris from the mines. Frogs thrive in clear water, and this stretch is about the only one in this neighborhood that is clear and limpid. The frogs sought after are what are known as the French frog; a large, fully grown one will weigh nearly half a pound, the smaller ones only two or three ounces. These denizens of the ponds are not captivating in appearance, but for the epicurean taste they are voted the greatest delicacy, and are therefore much sought after, and command a high price in the cities. The meat is considered far superior to chicken, or any other delicacy. The catch of the afternoon's sport embracing only two or three hours, was 14 frogs—big and little. This was considered a fair catch. The commercial value of the lot would amount to \$5, or so from the high-toned restaurants of the large cities, where such food is appreciated. Of course the hunters in this instance were out after the delicacy for themselves.

The method of catching them with rifles we are not able to explain. The object of shooting is not to kill, but to cause them to rise to the surface so as to enable the hunters to catch them alive.

The raising of these frogs might be made a very profitable industry.

They would not thrive in this section. The climate and other conditions are favorable for such an enterprise. Why not start a frog farm? There is little expense attached to such a scheme, and a big profit is held out to the one who embarks herein. It is made a thriving business in France, and other places in Europe, where the value of the flesh as an article of food is well recognized. Frogeries abound in such countries. Why not Amador start a frogery?

Baseball—Jackson vs. Volcano.

A picked nine from the Jackson social and athletic club contested on the local diamond last Sunday afternoon with a picked nine from Volcano. The line up was as follows:

Jackson. Volcano.
D. Fortner E. Woolfork
S. Arditto A. Giannini
G. Veta F. Bradshaw
Counors Tam
Doan Brignole
W. Fortner Boro
J. Podesta Lagomarsino
M. Kead Grillo
J. Thomas Prichard

The local boys scored an easy victory. They scored 6 runs in the first innings, 3 in the fifth, 1 in the seventh and 5 in the eighth, making a total of 15 in eight innings. It was unnecessary to play the ninth.

The Volcanites made 2 runs in the third, 3 in the fourth, 4 in the fifth and 6 in the eighth innings, making 10 runs in nine innings.

Butcher Shop Sold.

At a special meeting of the Jackson social and athletic club, held Monday evening May 27, a volunteer fire company was organized to take charge of fire matters in connection with the city government. The officers elected were John Garbarini, fire chief; George Vela, secretary fire department; Charles Tam, treasurer for fire department; T. Burrows treasurer for company, and also foreman. A committee of three, namely, J. Garbarini, R. C. Bote and Geo. Vela, was appointed to frame by-laws, to be submitted to the next meeting. The membership of the company, to be from 20 to 25 men each, has not been selected yet.

Fire Department Organized.

At a special meeting of the Jackson social and athletic club, held Monday evening May 27, a volunteer fire company was organized to take charge of fire matters in connection with the city government. The officers elected were John Garbarini, fire chief; George Vela, secretary fire department; Charles Tam, treasurer for fire department; T. Burrows treasurer for company, and also foreman. A committee of three, namely, J. Garbarini, R. C. Bote and Geo. Vela, was appointed to frame by-laws, to be submitted to the next meeting.

ROYAL costs you a few cents more per can than Alum or Phosphate of Lime powders, but it is worth far more than the difference to keep your biscuits, cakes and pastry free from the injurious effects of these cheapening substitutes.

Continued use of Alum means permanent injury to health.

Avoid Alum Ailments—Say plainly
ROYAL BAKING POWDER

Habit-forming Medicines.

Whatever may be the fact, as to many of the so-called patent medicines containing injurious ingredients as broadly published in some journals of more or less influence, the publicity has certainly been great, but there is also a need to call attention to this subject. It has in a considerable measure, resulted in the most intelligent people avoiding such foods and medicines as may be fairly suspected of being injurious. The drug ingredients complained of—Recognizing this fact some time ago, Dr. Pierce, of Buffalo, N.Y., "took time by the forelock," as it were, and published in all the ingredients of which his popular medicine contained. This has completely forestalled all harping critics and all opposition that might otherwise be urged against his medicines, because they are now on record as being safe. Furthermore, from the formula printed on every bottle wrapper, it will be seen that these medicines contain no alcohol or other habit-forming drugs. Neither do they contain any narcotics or injurious agents. They are entirely vegetable, extracted from the roots of medicinal plants found growing in the depths of our American forests and of well known botanical value.

In stead of alcohol, which occurs in small portions long continued, as in obstinate cases of diseases, becomes highly objectionable from its tendency to produce a craving for stimulants, Dr. Pierce employs ether, the cooling action of the Golden Seal root, Stone root, Black Cherry bark and Bloodroot, contained in "Golden Medical Discovery" in all bronchial, throat and lung affections attended with severe colds. As will be seen from the name of the medicine, Dr. George Coe of New York; Barthelow of Jefferson Medical College, Phila.; Scudder, of Cincinnati; Ellingwood, of Chicago; Hale, of Chicago; and others, who stand as authorities in their several schools of practice, the foregoing are among the very best ingredients that Dr. Pierce could have chosen to make up his famous "Discovery" for the cure of not only bronchial, throat and lung afflictions, but also of chronic catarrh in all its various forms wherever located.

Love Potions.

Love potions as used by the peasants of lower Austria and Syria are generally taken by the person who wishes to be loved. The common habit is to consume minute portions of white arsenic, which will in a few weeks develop a thin, pale girl into a plump, rosy-cheeked beauty. Great care has to be exercised in taking the arsenic or death results, and when the habit is once formed it usually lasts for life, since the body becomes uncomfortable and even diseased, showing all the symptoms of arsenic poisoning, if the habit is broken off.

Some of the eastern nations use love potions differently. If a girl loves a man and he seems cold, she contrives to give him a drink of hashish, obtained from Indian hemp. The man's brain becomes fogged, and he is ready to believe anything that is suggested to him. The girl suggests to him that she is beautiful and thus compels him to regard her unlovely features as she desires.

The Human Electric Battery.

The superstition that human beings should sleep with their heads to the north is believed by the French to have its foundation in a scientific fact. They affirm that each human system is in itself an electric battery, the head being one of the electrodes, the feet the other. Their proof was discovered from experiments which the Academy of Sciences was allowed to make on the body of a man who was guillotined. This was taken the instant it fell and placed upon a pivot free to move as it might. The head part, after a little vacillation, turned to the north, and the body then remained stationary. It was turned half way round by one of the professors, and again the head end of the trunk moved slowly to the cardinal point due north, the same results being repeated until the final arrestation of organic movement.

The Tobacconist's Envy.

One of the most peculiar things in the whole history of signs is the fact that while all other shopkeepers were patronizing the embryo painters the tobacconist always called upon the woodcarver on the continent as well as in England. As long ago as Elizabeth's reign the wooden image of the black boy was the favorite sign of the tobacco dealers. Later the customary sign was the Highlander or a figure of Sir Walter Raleigh. In Holland, for some strange reason, the tobacconists adopted the dalmatian as their sign, with the motto, "Consolation for sucklings." The Indian, naturally enough, has always been the predominant sign in this country, although once in awhile a reversal to the type crop out with the ancient black boy.

The Great Jenner.

An Englishman had occasion to go often to an eminent physician and said to James: "You will be tired of opening the door for me." "Not at all, sir," was the gracious reply, "you are but a bump in the ocean."

The School.

"How do you get those clinging girls?" asked the country cousin. "Hanging from street car straps," answered the city girl.—Washington Herald.

False Economy. There is vast difference between the economy which administers wisely and that niggardly economy which saves for the sake of saving and spends a dime's worth of time to save a penny. I have never known a man who overestimated the importance of saving pennies to do things which belong to large minds.—Success Magazine.

MERELY A MASTERPIECE.

Not a "Message" in Lovely Diction For the Junior Manager.

A man who wanted to lecture called at a bureau presided over by two managers.

He aroused their interest with a lecturer's art, says the Lyceumite, but unfortunately the senior member was just starting on a trip and would not return for at least a month.

The senior partner called a young man to one side and exacted a solemn promise that he would not visit another bureau or read his lecture to anybody until after he had given this particular manager a reading and a chance to make him offer a month hence.

The interest of the junior member, however, was at white heat, and he kept sending for the young lecturer, insisting that he come down to the office and read his lecture. The young man refused with as much tact as possible, but this only increased the anxiety of the junior.

The interest of the junior member, however, was at white heat, and he kept sending for the young lecturer, insisting that he come down to the office and read his lecture. The young man refused with as much tact as possible, but this only increased the anxiety of the junior.
